

ABSTRACT

In a digital camera (1), an LCD display unit (11) is arranged to the back of a lens barrel (3) having a CCD substrate (9) arranged to the right of the camera, and the components around the lens barrel are assembled as a unit while an image pickup substrate (10) is arranged to the left of the lens barrel (3). Further, a battery chamber (24a) and electric substrates ((A)6 and (B)7) are arranged to the left of the camera, a strobe light-emitting unit (5) is arranged to the top in the center of the camera and a strobe condenser (14) is accommodated on the back of the strobe light-emitting unit (5) in a long space sandwiched by the battery chamber (24a) and the lens barrel (3).
